

Waste Site Reclassification Form

Date Submitted: 3/24/2000	Operable Unit(s): 100-KR-2	Control Number: 2000-017
Originator: J. W. Golden	Waste Site ID: 100-K-51	
Phone: 376-6961	Type of Reclassification Action:	
	Rejected <input checked="" type="radio"/>	
	Closed-Out <input type="radio"/>	
	No Action <input type="radio"/>	

This form documents agreement among the parties listed below authorizing classification of the subject unit as rejected, closed-out, or no action and authorizing backfill of the site, if appropriate. Final removal from the NPL of no action or closed-out sites will occur at a future date.

Description of current waste site condition:

The site is a white, portable steel building, with no windows, and three doors that are all on one side. It is located approximately 150 meters (492 feet) west southwest of the 105-KE Reactor Building, and northwest of the 1717K Maintenance Building. The site is being used by the Spent Fuel Division for the 90 day storage of hazardous waste.

RECEIVED
OCT 03 2000
EDMC

Basis for reclassification:

The site is maintained on the "PHMC 90 Day Pad Inventory Report." This method for managing active 90 Day Storage Areas is in agreement with Section 2.0, "Scope," of TPA-MP-14, and thus tracking through WIDS is not necessary. The 90 Day Storage Area and all dangerous waste are managed in compliance with WAC 173-303-200(b)(i) and will be closed in compliance with WAC 173-303-630(10).
